

Ksenia Bestuzheva

<https://kbestuzheva.github.io>

Optimisation Researcher

bestuzheva@zib.de

Mathematical optimisation researcher working at the intersection of fundamental algorithmic research and computational practice in mixed-integer linear and nonlinear optimisation. Research interests include branch-and-bound methods, relaxations and cutting planes, optimality conditions, algorithm and mathematical software design, and the development of optimisation methods for challenging real-world problems as well as of general-purpose optimisation solvers.

EDUCATION

Ph.D. in computer science, *Australian National University* (Canberra, Australia) 2015-2019
Thesis title: Global Optimisation for Energy Systems
Supervisors: Dr. Hassan Hijazi, Prof. Sylvie Thiebaux, Prof. Markus Hegland

Diplom in applied mathematics and computer science, *State Management University* (Moscow, Russia) 2009-2014
With highest distinction

WORK EXPERIENCE

Guest lecturer, *Free University of Berlin* (Berlin, Germany) 2026

- teaching the course "Linear Algebra I" (two lectures and one exercise session per week)

Senior software developer, *GAMS Software GmbH* (Berlin, Germany) 2025-2026

- solver development, optimisation research

Head of research group, *Zuse Institute Berlin* (Berlin, Germany) 2023-2025

- coordination of the group's research in mixed-integer linear and nonlinear optimization
- PhD student supervision
- funding acquisition

Head of development, *SCIP Optimization Suite* 2023-2025

- coordination of a developer team across multiple universities and research organisations
- communication with users and contributors

Head of SynLab, *Research Campus MODAL* 2023-2025

- coordination of research activities in accordance with the goals of MODAL; grant application writing and reporting

Postdoctoral researcher, *Zuse Institute Berlin* (Berlin, Germany) 2018-2023

- research in the area of mixed-integer nonlinear programming
- development of the solver SCIP
- MSc student and intern supervision

TEACHING EXPERIENCE

Theses completed under my supervision

- F. Geis. Selecting branching rules for MINLPs via machine learning. Master's thesis, Technical University of Berlin, 2025
Supervised jointly with Dr. Timo Berthold.
This work considers nonconvex mixed-integer nonlinear programs, where branch-and-bound algorithms have to branch on both integer and continuous variables in order to find a global optimum. The thesis proposes a machine learning approach for deciding, for a given instance, whether branching is to be performed on integer variables first, or whether continuous variables should be considered for branching together with integer variables.
- H. Müller. Algorithms for constrained optimization using sums of nonnegative circuit polynomials certificates. Master's thesis, Humboldt University of Berlin, 2021
Supervised jointly with Prof. Andrea Walther.
The thesis introduced a new branch-and-bound framework for global polynomial optimisation that employs Sums of Nonnegative Circuit polynomials (SONC) nonnegativity certificates to obtain dual bounds at nodes of the branch-and-bound tree.

Teaching assignments

- Course "Linear Algebra I" at the Free University of Berlin in the summer semester of 2026
- Seminar on discrete optimisation and machine learning at the Technical University of Berlin
(<https://sites.google.com/view/seminardoml-rose2021/previous-semesters/rose-2024?authuser=0>)

Other teaching experience

- Lectures and interactive sessions on mixed-integer nonlinear programming at the summer schools Computational Optimization at Work 2020 and 2024 (lecture recordings available online at <https://www.youtube.com/watch?v=BRe8855C4BA> and <https://www.youtube.com/watch?v=m3LQep1qYA4>, respectively)
- Co-supervising an ongoing Ph.D. thesis on column generation approaches to production-maintenance scheduling
- Supervision of international undergraduate interns
- Participation as a mentor in Google Summer of Code projects

INVITED RESEARCH WORKSHOPS

- Combinatorial Optimization Workshop (Aussois, 2023) - invited participant
- Mixed Integer Programming Workshop (Los Angeles, 2023) - invited speaker
- Workshop "Discrete Nonlinear Optimization: Mathematics and Algorithms" (Oberwolfach, 2027) - invited participant

AWARDS

- COIN-OR Cup: Hassan Hijazi, Guanglei Wang, Ksenia Bestuzheva, Smitha Gopinath, Mertcan Yetkin, and Carleton Coffrin (Gravity) (03.11.2021)
- Best Student Paper Award, 24th National Conference of the Australian Society for Operations Research (18.11.2016)

OTHER RELATED EXPERIENCE

Scientific committee member , <i>Global Optimization Workshop</i>	2025
Technical editor , <i>Mathematical Programming Computation</i>	2022-present
Performing technical reviews of submitted articles focusing on the software and/or data aspect of the submission	
Program committee member , <i>Symposium on Experimental Algorithms</i>	2024
Contributor , <i>ASCEND - mathematical modelling software</i>	2012-2016
Worked on dynamic modelling, participated in two Google Summer of Code (GSOC) projects as a student (2012, 2013) and in two GSOC projects as a mentor (2015, 2016)
